# **Historical Election Integrity?**

Per BING Chat AI, when I inquired into election data for each general election from 2000 to 2020 here is what it came up with. How reliable is that?

| Here are the numbers of registered voters in the U.S. for the general elections from 2000 to 2020:   |                         |
| 2000: The U.S. Census Bureau reported that there were approximately 156 million registered voters  |                         |
| 2004: The U.S. Census Bureau reported that there were approximately 122 million registered voters  |                         |
| 2008: The U.S. Census Bureau reported that there were approximately 146 million registered voters  |                         |
| <ul> <li>2012: The U.S. Election Assistance Commission reported that there were approximately 214 million<br/>active registered voters<sup>5</sup>.</li> </ul>   |                         |
| <ul> <li>2016: The U.S. Election Assistance Commission reported that there were over 209 million active registered voters<sup>6</sup>.</li> </ul>  |                         |
| <ul> <li>2020: The U.S. Election Assistance Commission reported that there were over 209 million active<br/>registered voters<sup>6</sup>.</li> </ul>  |                         |
| Please note that these numbers are approximate and may vary slightly due to different sources and methods of calculation. Also, the number of registered voters can change between elections due to factors such as population growth, changes in voter registration laws, and efforts to register new voters. |                         |
| <b>Note:</b> The 2004 data shows how unreliable the systems was as the DNC tried to oust Bush af four years. Later DNC's efforts to rig the 2008 election soon becomes obvious per tracking data via<br>Microsoft Bing Q SEARCH CHAT   | the U.S. FEC vs CB.     |

Per official state records for all 50 states and D.C. how many people cast a vote in the 2000, 2004, 2008, 2012, 2016, and 2020 general elections?

|           |  |  |   |                                       |            |

**NOTE:** Bing Chat AI admits that the voter counts don't add up in 2004 and the same might be said for 2008 considering historic voter turnout (see chart on last page)?

Footnotes: BING AI sources provided in top down order...

### Question #1

- 1 https://www.census.gov/data/tables/2000/demo/voting-and-registration/p20-542.html
- 2 https://www.census.gov/content/dam/Census/library/publications/2002/demo/p20-542.pdf
- 3 https://www.fec.gov/resources/cms-content/documents/2004tables.pdf
- 4 https://www.census.gov/history/pdf/2008presidential\_election-32018.pdf
- 5 https://www.eac.gov/news/2017/06/29/newly-released-2016-election-administration-and-voting-survey-provides-snapshot
- 6 https://www.eac.gov/news/2021/08/16/us-election-assistance-commission-releases-2020-election-administration-and-voting

#### Question #2

- 1 https://en.wikipedia.org/wiki/2000 United States presidential election (unreliable source?)
- 2 https://www.fec.gov/resources/cms-content/documents/2004tables.pdf
- 3 https://en.wikipedia.org/wiki/2008\_United\_States\_presidential\_election (unreliable source?)
- 4 https://uselectionatlas.org/RESULTS/national.php?year=2012 (unofficial source?)
- 5 https://en.wikipedia.org/wiki/2016 United States presidential\_election (unreliable source?)
- 6 https://www.cfr.org/blog/2020-election-numbers (odd source selected by AI?)

#### Question #3

BING Chat AI then admits that the results were odd once it did the math using its own selected sources. If you read the article from <u>CFR.org</u> (footnote 6 above) you won't have much problem figuring out that crunching numbers, counting registered votes, counting votes and getting the facts correct can be difficult at best.

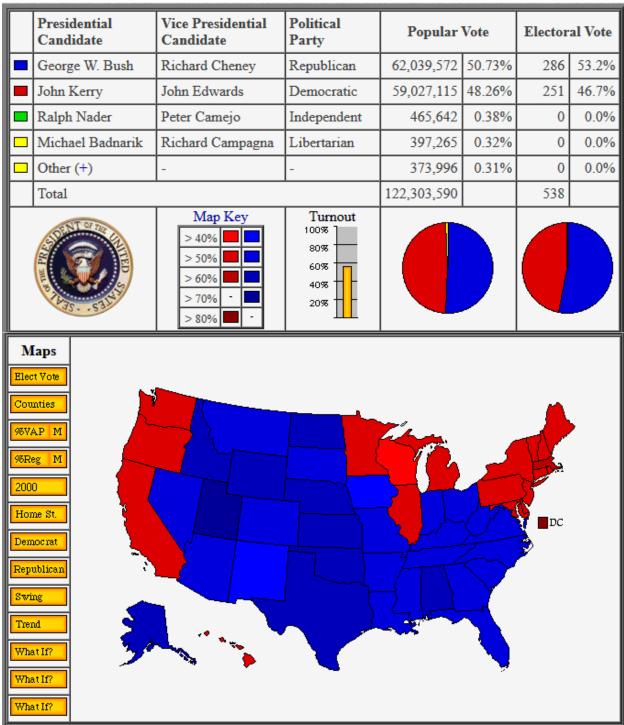

The real question is...

If you use the same source, which should be reliable, to gather vote counts, what kind of results or trends cropped up for each general election for President in 2000, 2004, 2008, 2012, 2016 and 2020?

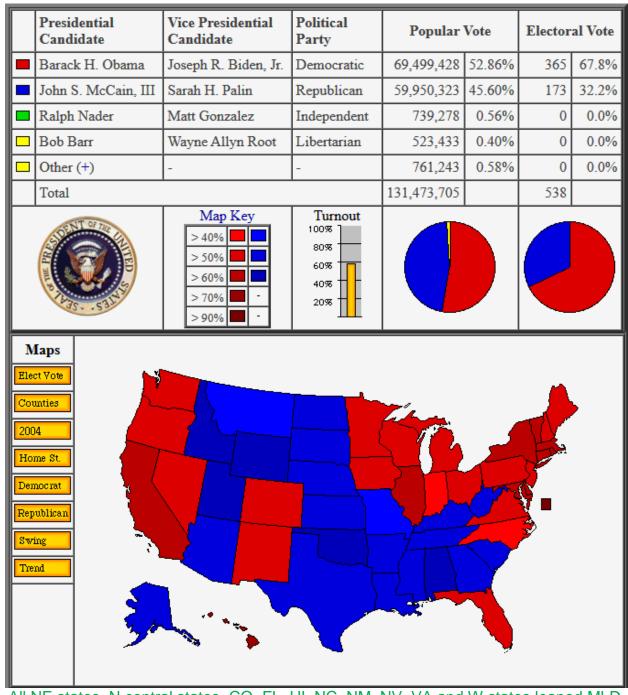

Answers (start on next page)...

| Wreg M       1996       Home St.       Democrat       Republican       Green       Swing       Trend       What If?   | a<br>c  |

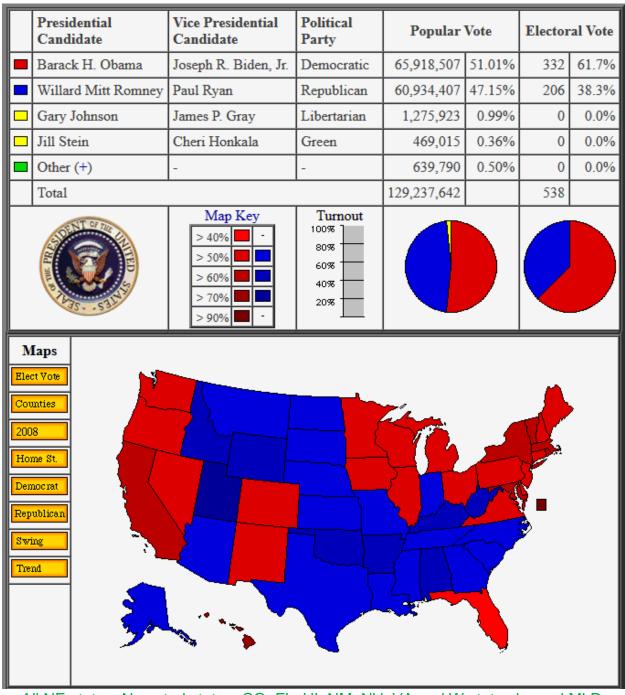

Most NE states, N central states, NM, HI and W states leaned MLD. State by State Data

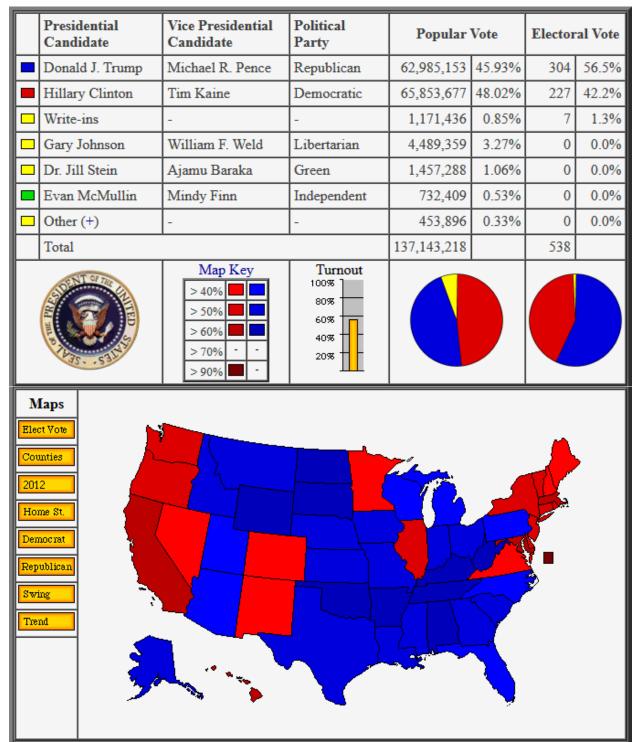

All NE states, N central states, HI and W states leaned MLD. NH & NM flipped while Bush gained over the MLDs. <u>State by State Data</u>

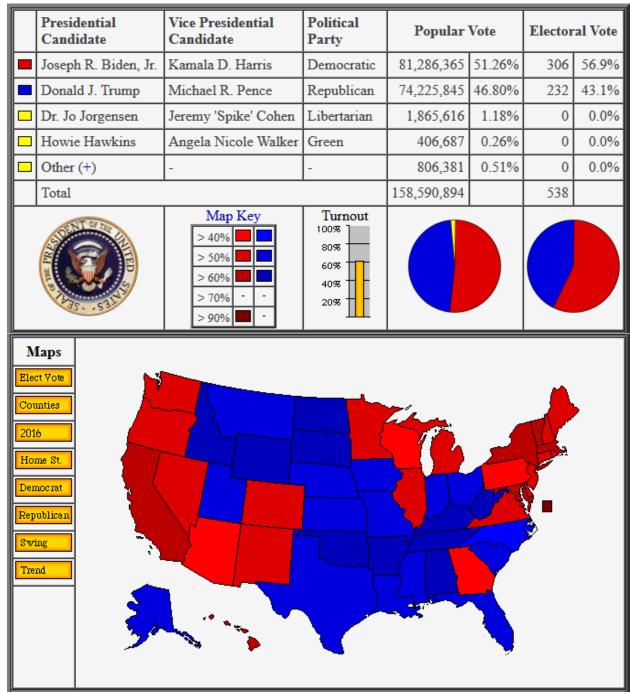

All NE states, N central states, CO, FL, HI, NC, NM, NV, VA and W states leaned MLD. The MLDs probably rigged this election to put Obama's MLDs in charge over Clinton or McCain. <u>State by State Data</u>

All NE states, N central states, CO, FL, HI, NM, NV, VA and W states leaned MLD. NC & IN flipped back to GOP while Obama lost votes but held on. <u>State by State Data</u>

Most NE states, CO, HI, IL, MN, NM, NV, VA and W states leaned MLD. Trump's win surprised the MLDs who claimed election rigging when they tried but failed to rig the system for Clinton; hoping voters would look the other way with propaganda media help. <u>State by State Data</u>

Most NE states, N central states, AZ, CO, GA, HI, NM, NV, VA and W states leaned MLD. The MLDs came out of the closet and went all out to openly rig this election by invoking illegal voting practices in many states (machine hacking, fake mail and stuffing drop box ballots) thanks to the COVID excuse; to make sure Trump was ousted this time around, again with propaganda media help. <u>State by State Data</u>
